Architectural concept by CU “RESERVE” has won the competition to build the new Medical center

In order to provide the necessary medical assistance to the population of the “New Moscow” as well as Solntsevo, Boutovo and Novo-Peredelkino districts, the Government of Moscow took the decision to build a modern medical center in Kommunarka settlement. By its dynamic shape that is thought to interact with the surroundings, the future Center should create a comfortable environment for patients, visitors and members of staff. Several leading Moscow architecture firms have been invited by the Moscow Committee for Architecture and Urban development to take part in the competition. The best architecture concept that has been chosen by the Jury was the one presented by the team of CU “RESERVE”. We congratulate all authors of the project as well as the members of our firm.
